

ADC-3035L

Connected Car

Real time car status. Driver safety alerts.

Connected Car allows customers to track their vehicle's location, monitor its diagnostic health and receive alerts for speeding, towing and more—all from our mobile app. Its dedicated cellular connection and backup battery ensure customers get 24/7 awareness, even when the car is parked and the engine is off. Plus, our document storage feature lets customers keep digital copies of licenses, insurance cards, vehicle registration, inspection paperwork, and more within the mobile app for easy access.

Special Features

VEHICLE DIAGNOSTICS

Maintenance alerts and real-time data in the mobile app help keep vehicles in good working order.

-  Check Engine
-  Low Battery
-  Low Fuel

FAMILY DRIVING

View trip recaps—see routes and gauge fuel efficiency. Monitor drivers for speeding or adjust habits to reduce wear and tear.

-  Excessive Speeding
-  Sudden Acceleration
-  Hard Braking

VEHICLE SECURITY

Protect one of their most valuable assets against theft and damage with location tracking and unexpected movement alerts.

-  Car Location
-  Car Towed
-  Unplugged Alert

One App for Home + Car

Connected Car integrates seamlessly with Alarm.com systems.

Most customers can install the device themselves—they just plug it into their vehicle's OBD-II port and they're good to go!

PRO TIP

Add the Car Connector as a geo-device to trigger lights and thermostats when they're close to home.

Visit the Alarm.com Partner Portal to purchase Connected Car devices and access marketing, installation and support resources.
