Temperature Control

All-in-one energy, comfort & security

Get ready to expand your offering and create more engaged customers with the latest features from our ENERGY STAR® certified smart thermostats. Alarm.com smart thermostats offer easier installation, S2 Security, and advanced customer features for energy-saving capabilities. Provide your customers the ultimate level of comfort and peace of mind they can't get anywhere else.

ENERGY SAVINGS

- + Automatically adjust the temperature on extremely hot or cold days or when no one is home.
- + Optimize settings with Scenes, schedules, and Alarm.com Places.
- + Easily enroll customers into energy-saving programs for reduced rates and rebates with leading utility providers.

PROACTIVE COMFORT

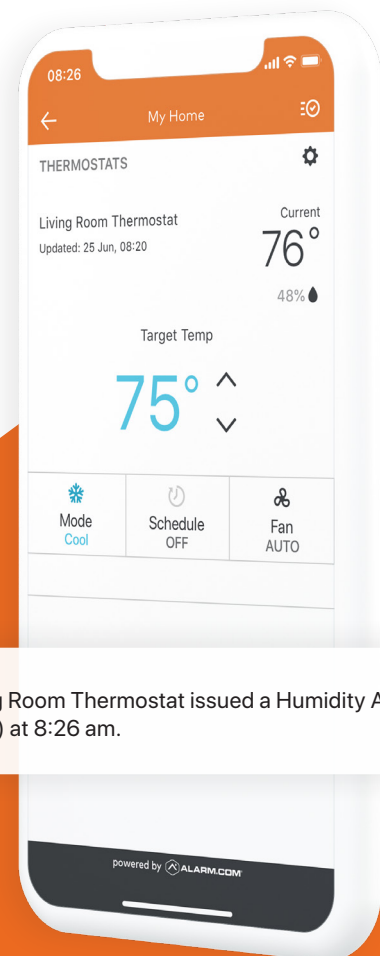

- + Set up alerts for common HVAC issues to prevent system failures or expensive emergency repairs.
- + Smart Humidity Control adjusts the humidity set point and prevents health risks or cleanup costs of mold.
- + Add a temperature sensor for areas that sway too low or high, like a basement or kid's playroom.

SEAMLESS INTEGRATION

Alarm.com smart thermostats respond automatically to system occurrences. They can:

- + Turn off and prevent the spread of fumes if the system detects a fire.
- + Turn off when a window's left open to reduce wasteful energy.
- + Alert customers of a temperature change or concerning humidity level.

Visit the [Alarm.com Partner Portal](#) for marketing, install, and support resources.

Living Room Thermostat issued a Humidity Alert (48%) at 8:26 am.

EASY INSTALLATIONS

- + Use the local configuration wizard or MobileTech to guide you through a fast and accurate install experience.
- + Z-Wave SmartStart lets you scan and add the thermostat or temperature sensor prior to the install appointment.

ADC-T40K-HD OFFERS EVEN MORE ENGAGING FEATURES:

- + A wake on approach screen that greets users with different messages (e.g., "good morning").
- + A high-resolution, full color touchscreen display.
- + Monthly HVAC reports that give users insights into their heating and cooling system to optimize performance and avoid costly repairs.
- + Humidity and vent control for maximum comfort.
- + Set up energy-saving schedules right on the screen.
