

# Elevated Enterprise Management

## Enhanced multi-location management at every organization level

Customers can set up accounts to reflect the hierarchy of their organization to ensure the account, access, and location are seamlessly managed in one place by a single person or group of administrators. With three tiers (Enterprise > Subgroup > Locations), it's easy to optimize the management of the Alarm.com for Business unified platform and view actionable business insights.

### Across every level of the organization:

#### Oversee multiple locations

Customers can organize and manage multiple locations on one, unified security management platform in a way that reflects their natural internal hierarchy.

#### Manage users, user codes, and logins

It's intuitive and efficient to manage users, user codes, and logins.

#### Gain access to insights and reports

Robust business reporting provides actionable insights concerning the safety and security of the business.

#### Manage using a single unified platform

The reliable security and connected business platform that combines access, video, intrusion, and more so customers can manage through a single platform.
