

# Security Smoke Generator

## Deter intruders and protect assets with security smoke.

Alarm.com's Security Smoke Generator prevents burglaries by obscuring vision with dense smoke and deterring intruders within seconds. The Security Smoke Generator can be remotely deployed by an operator through the visual verification interface — or by a customer through the mobile app or customer website.

### Key Features

#### Asset Protection

The Security Smoke Generator deploys within seconds of identifying intruders, quickly enveloping your premises in a dense smoke that obscures visibility and protects your assets. This enables business owners to safeguard their high-value merchandise remotely, after hours, and while on the move.

#### Rapid Response

With the Security Smoke Generator, central station operators can be alerted to breaches, allowing for swift intervention.

#### Layered Security

Customers can gain an additional layer of protection from their existing video and intrusion systems with the Security Smoke Generator.

#### Non-Toxic and Harmless

The security smoke is non-toxic and easy-to-clean, ensuring the safety of occupants and minimizing any potential impact on merchandise.

**Visit the [Alarm.com Partner Portal](#) to purchase the Security Smoke Generator and access marketing, installation, and support resources.**
