

Autonomous Outdoor Security Drone

The future of smart security takes flight

Introducing the newest addition to Alarm.com's industry-leading ecosystem of integrated smart security solutions— an autonomous outdoor drone powered by Sunflower Labs.

Key Features

Quick response

Faster than any guard, the drone goes from standby to airborne in under five seconds. Automate flight response when events occur around a business or property.

Cover more ground

The drone can cover any part of a 4-acre area in under 30 seconds and a 10-acre area in under 90 seconds.

Force multiplier

Per hour operating costs are substantially lower than the cost of traditional guard service.

Unique synergy

Trigger drone flights from Alarm.com's robust ecosystem of powerful video cameras and intrusion sensors, as well as long-range sensors such as Flex IO™.

RVM Services

Pair the drone with Alarm.com's Remote Video Monitoring Services for turnkey 24/7 professional monitoring and response.

Contact your Account Executive for information about leasing an autonomous security drone.
