

Water Management

Protect your customers' homes from costly water damage and high utility bills

Alarm.com's water management solutions help customers stay informed on leaks, prevent flooding, manage consumption, and safeguard their home from costly water damage and high utility bills. These devices are designed to fit any customer's need and provide whole-property protection.

Key Features

- + Proactively detect catastrophic water damage
- + Receive alerts for leaks to prevent mold, water waste, and minor water damage
- + Save money and conserve water by providing water usage data
- + Detect and provide alerts for possible frozen pipes
- + Manage sprinkler and irrigation systems
- + Implement a whole-home solution with products that integrate with their security system

Alarm.com Water Sensor*
ADC-S40-W

Third-party integrations

From leak sensors to water metering and irrigation solutions, Alarm.com supports third-party options to detect leaks, automatically shut off valves, as well as monitor and control water usage to safeguard against costly repairs and high water bills.

The Water Meter reported unexpected water activity at 6:24 pm. High water flow rates were detected, and your water valve was closed to prevent damage.
