

Dash™

Keep customers safe and connected, 24/7

Introducing Dash, an Alarm.com Personal Safety & Awareness wearable solution that protects customers wherever they go.

With extended battery life, cellular network coverage, location sharing, and an easy-to-use panic button, Dash is designed to meet the needs of older adults living independently, their families, senior living communities and so many more. In an emergency, users can connect and speak to a trained operator directly from the device. Plus, customers can access information about their loved ones in their Alarm.com app and receive alerts so they can act if a potential issue, like a fall, is detected.

Key Features

Easy-access panic button and fall detection

Built-in accelerometer to help verify a fall versus everyday movement like sitting or lying down.

Real-time alerts for multiple users

Multiple family members or contacts can be notified.

Water resistant

Safe to wear in the shower or bath, where falls commonly occur.

Long-lasting battery

Up to seven days on one charge.

Compact and flexible

Wearable by breakaway lanyard, belt holster, or keychain.

In-app updates

Loved ones can check the app for updates on the location and battery life of the device.
