

HazeGuard

Deter intruders and protect assets with HazeGuard.

Alarm.com's HazeGuard prevents burglaries by obscuring vision with dense haze and deterring intruders within seconds. HazeGuard can be remotely deployed by an operator through the visual verification interface — or by a customer through the mobile app or customer website.

Key Features

Asset Protection

HazeGuard deploys within seconds of identifying intruders, quickly enveloping your premises in a dense haze that obscures visibility and protects your assets. This enables business owners to safeguard their high-value merchandise remotely, after hours, and while on the move.

Rapid Response

With HazeGuard, central station operators can be alerted to breaches, allowing for swift intervention.

Layered Security

Customers can gain an additional layer of protection from their existing video and intrusion systems with HazeGuard.

Non-Toxic and Harmless

HazeGuard is non-toxic and easy-to-clean, ensuring the safety of occupants and minimizing any potential impact on merchandise.

Visit the [Alarm.com Partner Portal](#) to purchase HazeGuard and access marketing, installation, and support resources.
