Temperature Control

All-in-one energy, comfort, and security

Bring comfort and convenience to your smart home with an Alarm.com smart thermostat. Sleek, secure, and easy to install, our thermostats save you money and time with advanced energy-saving capabilities and seamless automation.

Key Features

Energy Savings

- + Automatically adjust the temperature on extremely hot or cold days or when no one is home.
- + Automate settings with Scenes, schedules, rules, and Alarm.com Places.
- + Enroll in energy-saving programs for reduced rates with leading utility providers.

Easy Installation

- + Automatic wire detection and easy step-by-step configuration make installation a breeze.
- + Z-Wave SmartStart lets you scan and add the thermostat or temperature sensor prior to the install appointment.

Seamless Integration

Alarm.com smart thermostats respond automatically to system occurrences.

They can:

- + Turn off and prevent the spread of fumes if the system detects a fire.
- + Turn off when a window's left open to reduce wasteful energy.
- + Alert you to temperature changes or concerning humidity levels.

Proactive Comfort

- + Set up alerts for common HVAC issues to prevent system failures or expensive emergency repairs.
- + Smart Humidity Control adjusts the humidity set point and prevents health risks or cleanup costs of mold.
- + Add a temperature sensor to areas that sway low or high—like a basement or kid's playroom—to create a more balanced temperature throughout your home.

ADC-T40K-HD Offers Even More Engaging Features

- + A wake on approach screen that greets users with different messages (e.g., "good morning").
- + A high-resolution, full color touchscreen display.
- + Monthly HVAC reports that give users insights into their heating and cooling system to optimize performance and avoid costly repairs.
- + Humidity and vent control for maximum comfort.
- + Set up energy-saving schedules right on the screen.
