

Personal Safety with Professional Response

Safety Button brings Alarm.com's best-in-class security beyond the home—offering on-the-go protection anywhere in the U.S. When you feel uneasy but don't want to call 911, simply press and hold the Safety Button.

Once you release, you can either cancel the event or connect with a trained operator who can send help to your location.

Key Features

Discreet Emergency Assistance

Get help fast without making a call or sending a text.

Quick-Access Widget

Add the Safety Button to your phone's Home screen to request help quickly.

Personalized Profile

Add Emergency Contacts and Notes to your profile to provide responders with important contextual information during an emergency.

Ask your security provider about the **Safety Button** today!

How It Works

- ▶ Tap the Safety Button Home Screen card.
- ▶ Hold down the button.
- ▶ Release to begin a 10-second countdown. Enter your PIN to cancel.
- ▶ If not canceled, a trained operator receives your emergency request with your name, phone number, location, and PIN code.
- ▶ The operator will text and call to confirm.
- ▶ If there's no response, help is dispatched to your last known location.
