## Business Activity Analytics

With Business Activity Analytics (BAA) for commercial video, your customers can use their Alarm.com security cameras to gain insights on things like foot traffic patterns, counting customers, measuring queue wait times, and more. Add value and improve your customers business operations with proactive alerts and insightful reports that help them gain a deeper understanding of their business.

## RVM Services

**Remote Video Monitoring &  
Visual Verification of Alarms**

Remote Video Monitoring (RVM) Services enables professional monitoring and response of video events as well as Visual Verification of intrusion alarms.

## Perimeter Guard®

Stop intruders in their tracks with Perimeter Guard proactive defense. Perimeter Guard uses advanced Video Analytics to sound an alert and flash camera lights when unexpected visitors are detected.

## AI Deterrence (AID)

AI Deterrence (AID) combines innovative AI with Alarm.com's Video Analytics to deliver dynamic, AI-generated verbal responses to intruders.

## Video Door Station

**755P Video Door Station**

## Third-Party Camera Support

You can integrate third-party cameras with any Alarm.com for Business account, making it easy to retrofit video surveillance installations, offer custom systems, and pair third-party cameras to the unified Alarm.com for Business platform. Integrations with cameras using ONVIF and VAPIX allow for seamless integrations with the Pro Series CSVR.

## OpenEye: The Cloud Video Platform

Alarm.com's **OpenEye** platform for cloud-managed video surveillance is available for larger commercial installations that need more specialized camera options. **Visit [openeye.net](https://openeye.net) for more information.**

# Smart Security

Alarm.com partners with best-in-class security panel providers to seamlessly integrate with our solutions. Most compatible panels support Dual-Path and offer cutting-edge LTE network options.

## Sensors

Sensors are the key to gathering the data needed to successfully automate smart homes. Compatible sensor types vary by panel, but Alarm.com powered systems can integrate numerous types of sensors.

- + Fire
- + Smoke
- + Carbon Monoxide
- + Water
- + Motion
- + Window
- + Door
- + Glass Break

## Alarm.com System Enhancement Module

The SEM, now with dual-path, LTE, and Cat-M support, is the easiest and most cost-effective solution to upgrade compatible Honeywell Vista and DSC PowerSeries panels without replacing the existing hardware.

ADC-SEM300-PS  
ADC-SEM300-VT

## Alarm.com Universal Communicator

Upgrade legacy systems with the Universal Communicator. This cellular device unlocks next-gen smart security for compatible POTS-type panels, enabling advanced features like remote control and event notifications without replacing the entire system.

IQ Panel 5

IQ Pro

- ◆ Multi-partition support
- ▼ SmartStart-enabled

## Flex IO® – Remote Awareness

Monitor distant properties, perimeters, or assets with the Flex IO. This versatile cellular solution is battery-powered and built tough with a rugged weatherproofing, designed specifically for the outdoors. It also connects over the Cat-M network—no Wi-Fi required. An optional panel integration now provides a more enhanced experience for keeping an eye on what matters most.

ADC-FLEX-100

## Connected Fleet

Extend smart security beyond the walls of your customers' businesses with Connected Fleet. This intelligent sensor allows customers to track vehicle location, view engine status, and analyze fuel efficiency right from the Alarm.com platform. Real-time driver safety alerts, diagnostic alerts, and trip information offer peace of mind and 24/7 awareness of personal or company vehicles. Connected Fleet can support up to 100 vehicles per business location, making it an ideal solution for businesses of all sizes. Vehicles must have an OBD-II port to be compatible with Connected Fleet.

ADC-CC100

# Energy Management

Reduce energy bills with Alarm.com's smart thermostats and energy management technology. Extend property protection to temperature-controlled assets like refrigerators with temperature monitoring.

## Energy Monitoring Devices

---

Install power modules and clamps that can manage, monitor, and automate every appliance and track the energy footprint of the entire home.
