

iOS Widget for Saved Video Clips

Quickly View What's Happening Directly from Your Home Screen

iOS customers can keep tabs on activity at home—without having to open the app!

Users can customize a Home Screen Widget on their iPhone or iPad that displays four to 12 saved video thumbnails. To view a recorded clip of interest, they simply tap the thumbnail.

Key Features

Customizable Views

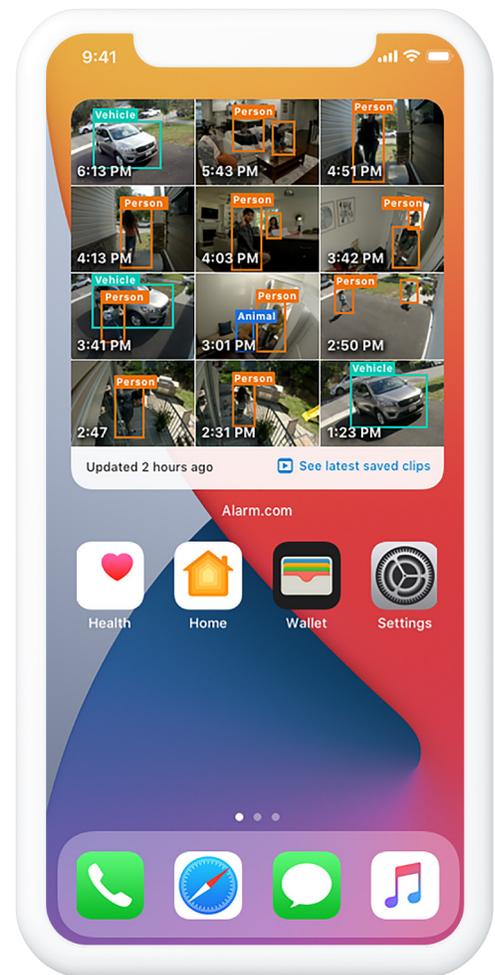

Configure a widget to include all cameras, a single camera, or a single camera group.

Multiple Sizes

Choose from small, medium, and large—the larger the widget, the more video thumbnails displayed.

Fast Access

Tap a thumbnail in the small widget to go to Saved Video screen. Tap medium or large widgets to launch video player.

Visit the [Alarm.com Partner Portal](#) to learn more about the iOS Widget for Saved Video Clips and how to set it up for your customers.
