

iOS System Control Widget

Effortless control at your fingertips

Take command of your smart security system—without having to open the app!

Create custom widgets on your iPhone and iPad to keep your home or business systems on guard. Run Scenes for seamless whole-property automation, plus perform commands for locks, lights, garage doors, and gates on the fly.

Key Features

Hassle-Free Security

Simplify your security routine with one-touch arming and disarming.

On-the-Go Control

Activate Scenes and remote control your favorite connected devices from anywhere.

Customized Your Way

Configure up to four actions with small-sized widgets and eight with medium widgets.

Just a Tap Away

Place conveniently on the Home or Today View screen for quick access.

Visit the [Alarm.com Partner Portal](#) to learn more about the iOS System Control Widget and how to set it up in a few simple steps.
